District Administration

Amy Hinds – Interim Superintendent of Schools

Lisa Hinds – Interim Assistant Superintendent of Schools

Diane Clary – Business Administrator

School Leadership Team

Michael Boyle – Interim Principal

Craig Kozens – Athletic Director/Dean of Students

Jennifer Sottak – Student Services Administrator

David Warrender – Director Huot Technical Center

Mollie Greeley – Director of School Counseling

Kaitlyn Salome - Adult Education Director

Core Values

The Laconia High School community provides a safe and supportive learning environment that encourages students to pursue excellence in achievement and to become contributing members of a diverse and changing society. We will accomplish this through promoting Pride, Leadership and Honor in each student. We believe in SACHEM **P.R.I.D.E.** These are the traits we work to instill in all of our students as a component of “**who they are becoming**”:

Personal Responsibility – Own your choices

Respect – Self, others, the institution

Integrity – Doing right at all times

Determination – Persevere regardless of circumstances

Empathy – Understand others’ feelings

Portrait of a Graduate

Laconia School District has worked collaboratively with the broader community to identify the core skills that every graduate of Laconia High School will demonstrate proficiency in when they complete their education. These attributes represent **what our students “can do.”** The instruction and practice of these skills and abilities are integrated into every component of our educational program:

PORTRAIT OF A GRADUATE

Communicate:
Effectively communicate for different purposes and varied audiences using appropriate media.

Collaborate:
Work effectively with and learn from others in a variety of situations, in school and beyond.

Create:
Create and refine a unique product or performance that reflects an individual's values, goals, and expression.

Persevere:
Persevere by overcoming challenges and the fear of making mistakes.

Problem-Solve:
Define the problem, identify the issues and interests, initiate a plan, execute it, and evaluate the reasonableness of the solution.

Self-Direct:
Set Goals, plan for achievement, independently manage time and effort, and reflect on one's progress.

The graphic features a central circular emblem for Laconia School District, established in 1875. The emblem is divided into six segments, each representing a skill: Communicate (speech bubble), Collaborate (group of people), Create (lightbulb), Persevere (person climbing a mountain), Problem-Solve (gears), and Self-Direct (person with a checklist). The central circle contains a large 'L' with a graduation cap and a Native American feather.

About Us

Laconia, New Hampshire is a small city with a population of about 16,000. Situated between three lakes, the city is located in a region that offers a variety of summer and recreational activities that draw significant numbers of tourists. The economy of the area is also based on a wide range of light industries and services. Laconia is the county seat for Belknap County and several state agencies have regional offices located here.

Laconia High School is a public, comprehensive, grades 9-12 high school with a current enrollment of approximately 600 students. Laconia High School's first graduating class consisted of eight members in 1878. The present building was constructed in the early 1920's with additions in the 1930's and renovation in 1974-1975. Laconia High School offers a wide variety of courses and co-curricular activities to prepare students for college and career and to develop community involvement, leadership skills, and well-rounded citizens. The J. Oliva Huot Technical Center opened in 1983 and had another wing added in 2012-13. The Huot Technical Center provides career and technical education programs for students from Laconia, Belmont, Franklin, Gilford, Inter-Lakes and Winnisquam Regional high schools.

Affiliations

Laconia High School is fully accredited by the New England Association of Schools and Colleges (NEASC). NEASC is a nongovernmental, nationally recognized organization whose affiliates include elementary schools through collegiate institutions offering postgraduate programs.

Accreditation by NEASC means that an institution meets or exceeds the criteria established by the commission. An accredited school or college is one that has available the necessary resources to achieve its stated purposes through appropriate educational programs; is substantially doing so; and gives evidence that it will continue to do so in the foreseeable future. The integrity of the institution is also addressed through the accreditation process. Accreditation by the New England Association is not partial, but applies to the institution as a whole. As such, it is not a guarantee of the quality of every course or program offered, nor of the competence of individual graduates. Rather, it provides reasonable assurances about the quality of opportunities available to students enrolled in the institution.

Laconia High School is a member institution of NEASC and, as such, is committed to its system of review. Inquiries regarding the status of an institution's accreditation should be directed to the administrative staff. Individuals may also contact the Association.

NHIAA

Laconia High School is a member of the New Hampshire Interscholastic Athletic Association. Since 1947, the NHIAA has made progress in organizing, supervising, and coordinating a state-wide athletic program. Superintendents, principals, athletic directors, coaches, state school board association members, and State Department of Education personnel have served on the council, the governing body of the organization. The administration of sports has been carried out by committees chosen from school and non-school people throughout the state. In addition to the administration of athletics, the association has formulated standards to ensure that competition is equalized. Regulations have been adopted to meet changing times and conditions. Changes, when necessary, are implemented by constitutional or bylaw amendment.

By this process, athletics takes its proper place in the entire educational program of the schools and makes a great contribution to the development of New Hampshire youth.

The mission of the New Hampshire Interscholastic Athletic Association, as the leader of high school athletics, is to ensure fair play in competition and equal opportunity in interscholastic opportunities.

Equal Opportunity Employer/Equal Employment Opportunities

The Laconia School District does not discriminate in its educational programs, activities, or employment practices on the basis of race, color, national origin, age, gender, handicap, or disability in compliance with the provisions of Title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1967, Title I of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Education for All Handicapped Children Act of 1975. Any person having inquiries concerning the Laconia Schools District's compliance with Title IX of the Education Amendments of 1972, Title VI of the Civil Rights Act of 1972, and 34 C.F.R. Part 106 or Section 504 of the Rehabilitation Act of 1973 may contact the District Human Rights Officer, Amy Hinds, at 39 Harvard Street, Laconia, NH 03246, 603-524-5710, ahinds@laconiaschools.org, or the Title IX District Coordinator, Lisa Hinds at 39 Harvard Street, Laconia, NH 03246, 603-524-5710, lhinds@laconiaschools.org.

Family Educational Rights and Privacy Act (1974)

The Family Educational Rights and Privacy Act (FERPA) affords parents and students over 18 years of age (“eligibility students”) certain rights with respect to the student’s education records:

The right to inspect and review the student’s education records within 45 days of the day the District receives a request for access. Parents or eligible students should submit to the Principal or his designee a written request that identifies the records they wish to inspect. The Principal or his designee will make arrangements for access and notify the parent or eligible student of the time and place where the records may be inspected.

The right to request an amendment to the student’s educational records, which the parent or eligible student believes are inaccurate or misleading. Parents or eligible students may ask Laconia School District to amend a record generated by the Laconia School District that they believe is inaccurate or misleading. They should write the Principal or his designee, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading.

If the Laconia School District decides not to amend the record as requested by the parent or eligible student, the School District will notify the parent or eligible student of the decision and advise them of their right to a hearing regarding the eligible student when notified of the right to a hearing.

The right to consent to disclosure of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official is a person employed by the Laconia School District as an administrator, supervisor, instructor or support staff member (including health or medical staff and law enforcement personnel); a person serving on the Laconia School District School Board; a person or company with whom the Laconia School District has contracted to perform a special task (such as an attorney, auditor, consultant, expert, or therapist); a parent or student serving on an official committee, such as a disciplinary or grievance committee or assisting another school official in performing his or her tasks; or the Laconia School District’s insurance carrier.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Upon request, the Laconia School District discloses education records without consent to officials of a school district in which a student seeks or intends to enroll. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the District to comply with the requirements of FERPA contact:

Family Policy Compliance Office
Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue SW
Washington, DC 20202-5920

Academic Program and NCAA Eligibility

For students who hope to play sports at a Division I or Division II college and receive a scholarship. Student-athletes who hope to participate in NCAA sports must register with the NCAA Eligibility Center. There are a number of criteria and specific course requirements that the NCAA considers when determining initial eligibility (whether or not a student exiting high school and entering college is eligible to participate in NCAA sports). The SRHS School Counseling and Athletic staff strongly encourage prospective college student-athletes to begin the NCAA eligibility process early. There are a number of forms that students, parents, and counseling staff must complete in order to officially register for NCAA Eligibility Center review of initial eligibility. As over 180,000 eligibility requests are received by the NCAA each year, it is helpful to begin the process as soon as possible. For more information about initial eligibility, please see the link below.

<http://www.athleticscholarships.net/ncaa-eligibility-center.html>

Student Services Program

Student Services at Laconia High School are designed to meet the New Hampshire Standards for the Education of Handicapped Students to provide a free and appropriate education for all identified educationally disabled students using an inclusion model. The proper referral, evaluation, and placement requirements must be met in order for a student to take part in this program. A referral may be made by any person who bears a responsibility for a child's welfare.

After it has been determined (through the referral, evaluation and placement process) that a student is educationally disabled, a variety of placement options become available. Such placements may include, but are not limited to, the following options: directed study support, consultative assistance, itinerant specialists, and instructional assistants, work-study, special classes, class monitoring, and/or individualized instruction. Students who are identified as educationally disabled will be graded according to their Individual Education Plan which defines specific goals, objectives, and modifications. A cooperative determination will be made by classroom teachers and the Special Education staff. These may include the following areas of concern: test-taking, assignment completion, study techniques, counseling, and/or vocational planning.

NOTICE OF RIGHTS PURSUANT TO RSA 186-C: 16-b, the Statute of Limitations for Special Education Cases

If you suspect that your child is educationally disabled and qualifies for such services, you may make a written referral requesting that the school district determine your child's eligibility. Such referrals should be addressed to:

Student Services Administrator
Laconia High School
345 Union Avenue
Laconia, New Hampshire 03246

School Counseling

The Laconia High School Counseling program is an essential part of the educational process for students. This program is designed to meet students' needs by helping them define and meet expectations in all facets of their lives – educational, emotional, social, and career. Each student will be assigned to a counselor upon entrance to Laconia High School.

School Counseling activities and reviews are conducted on a regular and planned basis with the goal of providing students with experiences to help them grow and to reach their full potential. Counselors provide direct services to students, as well as working with parents, school staff, and members of the community. Unless otherwise instructed in writing by a parent or guardian, services provided through the School Counseling Office will be provided to all students through self-referral, staff referral, and/or parent referral. Counselors are obligated to share information with parents of minors and others in the following circumstances: as ordered by a court of law; to protect a student from harm, abuse and neglect; and, to warn potential victims of the intent to harm.

Suggested Credits

There are a variety of educational opportunities available to students after high school. In an effort to provide some general guidelines, the chart below provides course requirements to help inform students on the credits they should have by content area:

Type of College	English	Social Studies Math Science	World Language
Selective 4 Year Colleges	5	4-5 5 4-5	4-5
4 Year Colleges	4-5	4 4 4	3-4
2 Year Colleges	4	3 3 3	0-2
Military	4	3 3 3	0

Graduation Requirements

The course requirements for graduation allows students to take a broad spectrum of courses across a variety of content areas with allowance for choices for electives. Though the chart spells out the minimum requirements, students are encouraged to take a full schedule of classes while at Laconia High School to prepare for college and career and to take advantage of the wide variety of educational experiences available.

Required Subject or Course Number of Credits Needed for Graduation
English 4 (English 9, English 10, American Literature, Senior Elective)
Fine Arts 1
Health 1
Mathematics 4
Physical Education 1
Science 3 (Physical Science, Life Science, Science Elective)
Social Studies 4 (Geo/Cult, Economics, American Government, US History)
Technology 1
Electives 7
Total Credits Required to Graduate 26 Credits

Early Graduation

Early graduation is a means to earn a high school diploma. If a student wants to graduate early, the student, parent(s) or guardian(s), Principal, Dean of Students, and a school counselor must all be involved in the process. If a student wishes to graduate early, they must follow the following procedure:

1. Student request: The student submits a formal, written request to the Principal explaining that s/he wants to graduate early and the reasons for wanting to do so. The statement must be submitted by July 1 after the student's sophomore year.
2. Parent letter: The parent(s) or guardian(s) submits a letter accompanying the student request supporting their child's request to graduate early and articulating their reasons for supporting the request.
3. School Counselor review: The student and a parent or guardian meets with a school counselor to review credits earned and to determine whether early graduation is possible

and if it is in the student's best interest. If it is, the school counselor will make a schedule for the following year to fulfill the rest of the student's graduation requirements.

4. Principal meeting: The Principal, a school counselor, Dean of Students, a parent, and the student review the student statement, parent letter of support, and student schedule for the next year. After this meeting, the Principal will approve or deny the request.
5. Students who chose to graduate early are still considered a junior and are required to meet all standards and requirements for underclassmen. Students graduating early do not have senior privileges. The only graduation activity that an early graduate is permitted to participate in is the Graduation Ceremony and no other senior events.

Eligibility for Extra-Curriculars

Eligibility for participation in Laconia High School athletics and other extra-curricular activities is determined by passing 3 blocked subjects in the 4 x 4 block schedule. As part of senior privileges, a senior who only attends less than 4 blocks would be fully eligible by passing all blocks they are enrolled in.

If a student fails to adhere to the above conditions, they would become ineligible (no practices/games/no meetings) for that grading period. Student athletes who were academically ineligible due to grades achieved in the quarter previous to the next season tryouts, may try out if he/she is passing three out of four classes at the time of tryouts. Students who were members of other extra-curricular activities who were academically ineligible due to grades may resume participating in the extracurricular activity once they are passing three out of four classes.

Weighted GPA for Reporting to Colleges and Universities

According to the College Board®, "Class ranking is a mathematical summary of a student's academic record compared to those of other students in the class. It takes into account both the degree of difficulty of the courses a student is taking and the grade the student earns. The compilation of courses and grades is converted to an overall grade point average (GPA), and the higher the GPA, the higher the student's class ranking." The GPA system used at Laconia High School to report out to colleges and universities is based on a 4.0 scale recommended by the College Board (see <http://www.collegeboard.com/html/academicTracker-howtoconvert.html>) that is weighted based on course level.

See Appendix D for the GPA Table for Reporting to Colleges and Universities

Laconia Academy is an adult evening high school diploma program. Students may take courses toward LHS graduation requirements at Laconia Academy. Further credits may be awarded with the Principal's permission. Contact the Laconia Academy Office at 603-524-5712 if you have further questions.

BRIDGE Program

The Bridge Program is to help low-credit students who are not on pace for graduation. We offer alternative classes and times of classes during the regular school day. A student participating in the Bridge Program will need to build an academic plan with their School Counselor and have the plan approved by the Principal or designee.

Students

-  Low credit, off track for graduation
-  5th year seniors considered
-  Students can take a combination of bridge, traditional, and night school classes as needed

Graduation Plans

-  Will have option to participate in LHS graduation and senior activities if diploma earned
-  Will have option to “bridge” to night school if all graduation requirements are not met

On-Line Course Work

Students can use a variety of on-line platforms, including but not limited to, Edmentum and VLACS, to engage in learning not otherwise offered through the Laconia High School program of studies; or as otherwise determined appropriate by the LHS Administration. See specific subsections with details for eligibility and access. All alternative schedule requests will be made using the Alternative Plan Form found in Appendix B.

Edmentum On-Line Learning

The Edmentum program provides students an alternate opportunity to recover credit and is available during pre-determined times of the school year, as well as when otherwise determined by school counseling and/or administration. See the *Credit and Course Recovery* section for further details. The course will be reflected on the student’s schedule and upon completion the student will receive a Pass/Fail credit on their transcript.

Virtual Learning Academy Charter School (VLACS)

VLACS is a New Hampshire approved Charter School and is free to NH residents. LHS can students take a VLACS course when the course is not offered at LHS. Students must complete the VLACS pre-approval form before the course can be inserted in the student’s schedule. A sample of this form is included in Appendix A – VLACS Pre-Approval Form. This form is also available in School Counseling. Once the VLACS course has begun, the course will be listed on the student’s schedule and the outcome of the course will be reflected on the student’s transcript. If a student does not complete the course in the time frame allotted, they will receive an F on their transcript.

Scheduling and VLACS

-  A student taking a 1.0 credit course that **begins at the start of semester one** will

-  be allotted one block in their LHS schedule to work on the course. If students do not finish their course within the first semester, they will then have the second semester to complete the course outside of their LHS schedule (underclassmen will still have 4 other classes; seniors at least 3 other classes). **It MUST be completed by the end of semester two.**
-  A student taking a 1.0 credit course that **begins at the start of semester two** will be allotted one block in their LHS schedule to work on the course. If not done by the end of the school year, students will then have the summer months to complete the course. **It MUST be completed by the start of the following school year.**
-  A student taking a 1.5 credit course that **begins at the start of semester one** will be allotted one block in their LHS schedule for both semesters. If the course is not complete by the end of the second semester, the student will have the summer months to complete it. **It MUST be completed by the start of the following school year.**
-  A student taking a 1.5 credit course that begins at the start of semester two will be allotted one block in their LHS schedule for that semester. If the course is not complete by the end of the semester, the student will have the summer months to complete it. **It MUST be completed by the start of the following school year.**

Students can take a VLACS course as an additional offering on their own at any time. Please note that the weighting and credits of the class will follow what is outlined by VLACS in the VLACS program of studies.

Credit and Course Recovery

Laconia High School provides options for students who have failed courses to recover credit in courses required for graduation. To be eligible for Credit Recovery, students need to have taken the class for the entire semester and received a grade of 55% or higher. Credit recovery opportunities take place during February vacation and the week after school ends for the year. Students who fail courses required for graduation with a grade of less than 55% are eligible for course recovery. Course recovery is a five week/45 hour competency-based program that takes place during the summer. Upon completion of credit or course recovery, students will receive Pass/Fail credit for the course on their transcript.

College Credit Opportunities

Early College at High School (formerly Running Start)

The Running Start program enables high school students to take Community College System of NH (CCSNH) courses for high school AND college credit. The courses that are available are determined on an annual basis and LHS currently partners with Lakes Region Community College (LRCC) for these options. A student must express an interest in this option at the start of the course, register with LRCC and pay a fee of \$150.00 per course and any associated fees. Upon successful completion of the course, students are awarded LRCC college credits. **A list of Early College courses for the upcoming school year is available in Appendix A**

Early College

Early College opportunities are offered to LHS students through Lakes Region Community College and the Community College System of NH. Early College is a dual enrollment program where high school students take college courses for both college and high school credit. These courses are typically offered at 50% of the traditional course cost and can occur both on campus and online. Students can take any courses offered for which they are eligible. Interested students should speak with their school counselor and complete an LRCC Early College Enrollment form (available in the Office of School Counseling).

Early College Online (formerly eStart)

eStart is an online dual credit program that enables high school students to take community college courses for dual high school AND college credit. Courses offered through the eStart program are 100% online college courses. Interested students should speak with their school counselor.

Extended Learning Opportunity (ELO)

An ELO is a learning opportunity initiated by the student for the purpose of typically acquiring “knowledge and skills through instruction or study outside the traditional classroom methodology.” Students can design a learning experience and demonstrate proficiency of agreed-upon competencies with the support of a cooperating educator and approval by the ELO Coordinator. ELOs at LHS follow a structure which may include: a thesis paper, structured research, technology integration, work with a community partner, a presentation and a reflection. ELOs are supported by a contract. Once the ELO opportunity has been initiated, the course will be reflected on the student’s schedule and the outcome of the course will be reflected on the student’s transcript.

Course Change – Add/Drop

Students may add/drop courses to their schedules, providing space is available and they receive approval from their school counselor, for a period of up to 5 course periods following the start of the course. After the add-drop period has passed, students are expected to remain in the class and are not permitted to exit the class without extenuating circumstances and approval from administration. If a student is permitted to withdraw the alternative grade of “WP” (Withdraw Passing) or “WF” (Withdraw Failing) will be assigned to the student’s transcript. Withdraw Passing will not be calculated in a student’s GPA. Withdraw and Withdraw Failing will be recorded as a zero score in GPA calculation.

If a student decides to make a schedule change during the add-drop period, students may be required to complete forms related to all course changes and obtain appropriate school, administrative and parent/guardian signatures. Please see Appendix C – Add/Drop Form.

Reassessment of Summative Assessments

Reassessment is offered and recommended for any student who earns less than a 70 on a summative assessment. Students are required to meet with the teacher and complete a reassessment contract outlining specific corrective actions and reteaching necessary before reassessment. Students are expected to complete their reassessment within one week of the initial assessment, although an extension is available with teacher permission. Through reassessment, a student could increase their grade to as much as an 83. Students who earn between a 70 and an 82 may do reassessment at the discretion of the teacher with the same criteria listed above. If a student completes a reassessment and receives a lower score than the original score earned, the high score of the two will be given to the student. Reassessment of assigned work is available until the unit summative assessment is taken. Work not completed or reassessed after that time is not available as the course moves forward. Students are not allowed to reassess final exams.

Sachem Support Block (SSB)

Sachem Support Block is 57 minutes of flexible time every day used for extra help, intervention, support, enrichment, or extension. Sachem Support Block is academic time, not a study hall or an advisory. SSB is student-driven, targeted, and academic. Monday through Thursday students will report to their scheduled/assigned locations, which may be different each day, for academic support, intervention, and/or enrichment. Students will meet with an assigned staff member each Friday to determine their schedule for the following week. Teachers will automatically schedule students to participate in remediation when their grade in class falls below 70%.

Transfer Students

Students transferring into or out of the district must begin the process with the School Counseling Department. For students transferring into the district, the School Counselor will review the transcript(s) from the other school(s) and discuss the best way to fulfill Laconia's graduation requirements. The School Counseling Office will transfer all courses taken and credits earned onto a Laconia High School transcript. Counselors will continue adding to this transcript as the student completes courses in Laconia. The student's information will also be entered onto the computer so that all transfer students will have a Grade Point Average. In order to ensure equity, transferred credits will be reconciled so that grades receive weights that are consistent with the Laconia High School grading policy.

If a student transfers from a school having a different credit system, the School Counselor will determine the number of appropriate credits for each course passed. The GPA and rank will then be determined. A student must be enrolled at Laconia for at least two full semesters before they can be eligible for class rank standing.

Explanation of Course Levels

To be successful at Laconia High School, students in all classes are expected to actively participate, complete assignments in a timely fashion, solve problems, read rigorous texts, write in a variety of domains, work in groups, communicate clearly, integrate technology, and critically analyze texts and data. These habits and skills are essential in the effort to prepare students for career readiness after high school. All courses at Laconia High School are designed to help students prepare for postsecondary opportunities after graduation. These opportunities include college/university study, career/technical school study, apprentice programs, military service, certification programs, as well as entry into the workforce. Courses are taught at three (3) levels to accommodate the instructional needs of students in the four (4) academic content areas. All course levels prepare students to be college and career ready upon graduation. Recommendations for the levels are based on the student's academic habits and skills, performance on previous internal assessments (based on course competencies and standards) in the respective content area, and external assessment scores. Examples of external assessments include the NWEA and SATs. Flexibility exists for students to assume greater challenges as their skills advance. Additionally, some courses are offered as a heterogenous grouping and will be inclusive of multi-levels.

Course Designations

Laconia High School categorizes its courses using the following:

F = Foundations

CCR = College and Career Ready

H = Honors

AP = Advanced Placement

Foundations

To be admitted into a Foundations class, students must demonstrate, using multiple measures, that their academic skills are below grade-level. Foundations classes are offered in the four (4) core academic areas to prepare students for entry-level career choices. These students are expected to:

-  Continue to work to build a foundation in literacy and math • Acquire or improve essential skills such as collaboration, communication, critical thinking, decision-making, and problem solving to promote career readiness
-  Receive greater support to achieve competence.

College and Career Ready

Students who want to access a four (4) year college or university, two (2) year college, or

technical training programs without remediation, seek out military options or enter immediately into entry-level career choices should access courses at this level. These students are expected to:

-  Read, write, speak, think, and problem-solve at or near grade level
-  Have a command of math skills at or near grade level
-  Complete rigorous independent reading and writing assignments outside class on a regular basis in a timely fashion
-  Be motivated and self-disciplined
-  Study a wide variety of topics and materials at great depth.

Honors and Advanced Placement

Students who are bound for a four (4) year college or university should access these courses. These students are expected to:

-  Read, write, speak, think, and problem-solve above grade level • Have a strong command of math skills above grade level, • Complete many rigorous independent reading and writing assignments outside of class on a regular basis in a timely fashion
-  Be highly-motivated and self-disciplined
-  Study a wider variety of topics and materials at a greater depth than students in other classes
-  For students in AP classes, they must satisfy the requirements on the respective College Board approved course syllabus and are encouraged to take the AP exam at the end of the course.

Honors Contract Option

In the instance where a student is unable to take an honors level course due to schedule conflicts or constraints that lead to an honors level course not being offered; students may discuss with the classroom teacher the Honors option. This allows a CCR level class to be taken at the Honors level and the student will receive Honors credit; once a student has contracted-up to the Honors Option, he/she is not able to return to the CCR-level coursework during that semester. The student must work with the classroom teacher to develop an Honors Contract which is due into the Office of School Counseling within the first ten (10) academic days of the semester. This contract requires approval and signatures of the student, parent/guardian, counselor and administration. Please see Appendix E for an exemplar of this contract.

Honor Roll

Students at Laconia High School will be recognized on the honor roll in three (3) ways. Course grades for Honor Roll recognition are non-weighted

-  HIGH HONOR ROLL WITH DISTINCTION: Student earns a 95 or above in all classes
-  HIGH HONOR ROLL: Student earns a 90 or above in all classes (all A's)
-  HONOR ROLL: Student earns an 80 or above in all classes (all A's and B's)

Minimum Scheduling Requirement

All students in grades 9-11 are required to take a full course-load each semester (4 credits/semester). Grade 12 students may reduce their course load as part of senior privilege, but it is recommended they take a full course load so they are college and career ready and take full advantage of LHS' educational opportunities. Seniors must carry at least three (3) credits to be eligible for honor roll recognition.

To participate in graduation activities, seniors must take three educational experiences each semester during their senior year unless an alternate plan supporting college and career readiness has been developed and approved collaboratively by Administration, student, and parent. Any student wishing to replace an academic class at LHS with an alternate educational opportunity must have a documented plan developed with the school counseling office. The following options would be an acceptable replacement to an academic course at Laconia High School:

-  College course(s)/Dual Enrollment
-  Extended Learning Opportunities
-  VLACS elective courses not offered at LHS

Embedded Huot Credits

The Huot Technical Center (Huot) provides additional opportunities for our students to increase their college and career readiness and academic standing (please reference the [Huot Program of Studies](#) in subsequent sections of this document). The Huot classes listed below allow LHS students to earn the following credit towards graduation requirements. Please note that each Huot class can only apply 1.0 credit on a singular basis. For example, Health Science I and Health Science II can only accrue 1.0 applied LHS science elective credit.

Huot Class	LHS Credit Applied Number of Credits
Digital Media Arts	Fine Art or Technology 1
Biomedical Technology Law Enforcement	Science Elective 1 Social Studies Elective 1
Health Science	Science Elective 1
Personal Finance	Math Elective 1
Accounting and Finance	Math Elective 1
Social Media Marketing	Technology 1
Pre-Engineering	Technology 1
Principles of Engineering Computer Integrated Manufacturing Computer Hardware, Networking, and Intro to Programming Automotive Technology	Math Fine Art* Fine Art* 1 Technology 1 Technology 1
Teacher Preparation Allied Health Non-LNA only Building Construction Plumbing and Heating	English Elective 1 Technology 1 Math 1 Math 1
Culinary Arts Winnisquam Agricultural Ctr	Math 1 Science 1

*Student must complete additional coursework for this credit

New Hampshire Scholars

The New Hampshire Scholars Program encourages and motivates all high school students to complete a rigorous course of study throughout their four-year high school career. The program is designed to prepare students for a competitive job market and admission to college or technical training. New Hampshire Scholars must have a GPA of 2.7 and an overall attendance rate of 90% at the end of Semester 1. New Hampshire Scholars also agree to the following series of courses:

Content Area	NH Scholars Course of Study	Number of Credits
English	English 9, English 10, American Literature, Senior English Elective	4
Mathematics	Algebra 1A, Algebra 1B, Geometry, Algebra II	4
Science	Life Science lab based, Physical Science lab based, Science Elective	3
Social Studies	Geography, American Experience, (US History/American Government/Economics)	3.5
World Language	World Language 2	

After successful completion of the above listed courses, students will be better prepared to enter college or the workforce. In addition, students who are designated as New Hampshire State Scholars will be candidates for certain types of scholarships and financial aid. State Scholars are recognized during the graduation ceremony with a ceremonial medallion. Students who are interested in the New Hampshire Scholars Program should speak to their school counselor. For more information on the New Hampshire Scholars program, see <http://www.nhscholars.org/Course.cfm>.

LHS Diploma of Distinction

The Diploma of Distinction is intended to recognize, and reward student achievement that exceeds the 26-credit diploma and fulfills specific and rigorous criteria. The intent of the Diploma of Distinction is to reward students for being purposeful in pursuing and maintaining consistent academic success over the entire course of their four years at Laconia High School. Diploma of Distinction Requirements:

-  Minimum of 3.0 GPA (B average) to qualify
-  Expected to complete 30 credits upon graduation
-  Fulfillment of a senior project requirement

Students who meet the qualifications to participate will be invited to participate in their junior year. Students will be required to submit a project proposal for approval. All students will participate in regular mentor meetings where they will work on project details, including action planning and participation journals. GPA and student transcripts will be monitored quarterly to ensure maintenance of minimum requirements. Final GPA will be calculated at the end of 3rd quarter of senior year to ensure all students are eligible for Diploma of Distinction. Students who have dropped below 3.0 or less than 30 credits will not qualify.

Course Catalog

The purpose of the Course Catalog is to provide the school community with brief descriptions of the wide variety of courses offered at Laconia High School. The curricula in the academic program focuses on Portrait of a Graduate skills connecting literacy, numeracy, problem-solving, critical thinking, mastering content, the arts, technology integration, communication, and collaboration. Students have the opportunity to balance their experience at Laconia High School with a mix of required academic classes, electives, dual enrollment classes, and classes that provide students with on-the-job training. The program is designed to meet the needs of a variety of students with various learning needs and styles.

Art, Technology & Music

Exploring Art Grades 9-12 1 credit CCR

In Exploring Art, students will be introduced to basic skills and art concepts of two and three dimensional art. Students will learn various techniques for creating fine art; including drawing, painting, ceramics, and printmaking. Students will demonstrate these various skills in creating their own artwork, and they will learn vocabulary associated with each technique. Students will be required to write responses on techniques learned and/or art history associated with techniques used, and will read and gather information from a textbook. This course serves as a foundation to higher level art courses that lead to college and career readiness in the fine arts. It is a thorough overview of the basic techniques in fine art and is open to all students.

Evolution of Crafts Grades 9-12 1 credit CCR

Students will be able to merge form with function; creating something beautiful as well as functional. This class is presented to expose students to the possibilities of the media and to serve as a source of inspiration. The following is a list of what will be covered: bookmaking /illuminated lettering, polymer clay/ clay, glass mosaics/ stained glass, basket making using coiling, paper mache, and paper plaiting, weaving with peg looms and back strap looms, beading using handmade looms and various beading techniques, fabric batik, and wire jewelry. Throughout the course, readings and writings will be done which are relevant to the topic being covered. Crafts, Contemporary Design and Technique is our text, which is often used as an introduction to a unit. Students are given follow up writing assignments where they are asked

about specific key topics. This may be in the form of vocabulary, art history, or on specific techniques. This class is open to all students.

Drawing Grades 9-12 1 Credit CCR

Students will use a variety of drawing materials and techniques to develop their skills. Emphasis will be on creating value, drawing from life and creating abstractions. This course will include sketchbook work, class critiques, creating a portfolio and will culminate with a final project.

Prerequisite: Exploring Art

Painting Grades 9-12 1 Credit CCR

Students will use tempera and acrylic paint along with watercolor and inks to explore color theory, painting techniques and styles. This course will include class critiques, creating a portfolio and will culminate with a final project. *Prerequisite: Exploring Art*

3D Forms Grades 9-12 1 Credit CCR

Students will use a variety of materials to create three-dimensional sculptures. Approximately one half of the course will be spent creating sculptures with materials such as foam core, cardboard and wire. The other half of the course will be devoted to working with clay and developing skills in ceramics. This course will include class critiques, creating a portfolio and will culminate with a final project. *Prerequisite: Exploring Art*

Exploring Digital Art Grades 9-12 1 credit CCR

This is an exploration course that introduces students to the world of digital art. The Adobe Creative Suite will be explored including InDesign, Photoshop, Illustrator, Fireworks, and Flash. There will be units on basic digital photography and multimedia as well.

Digital Drawing and Illustration Grades 10-12 1 credit CCR

In this course students will explore the world of computer drawing and animation. Adobe Illustrator will be used to render complex graphic designs and drawings. Flash will be used in the creation of frame by frame animation. Advanced students can explore video game design and more complex animation and drawing. This class may be taken multiple times for additional credit. *Prerequisite: Exploring Digital Art*

Characters and Comics Grades 9-12 1 credit CCR

The power of art is held in the story. Do you like to write? Do you like to draw? Have you ever felt it's not enough to do just one? Learn how to meld these two artistic expressions to create a unique voice that harnesses the power to tell a story with art.

In Characters and Comics we will study the history of comic strips, books, and graphic novels. Students will learn the fundamentals of character design through figure and animal drawing practices. Many styles of design will be experimented with such as Comic strip, Marvel, Anime, etc. This course will introduce you to drawing with Adobe Illustrator and Photoshop. No experience necessary but you must be willing to try!

GRAPHIC DESIGN Grades 10-12 1 credit CCR

Have an introductory understanding of digital photography and Graphic design, including but not limited to the history of the camera and how a camera functions. Elements and principles of composition to craft photographs. Photo editing in Adobe Photoshop CC. Photography career applications: Fine Art, Editorial, Commercial, Product, Portrait. Application of Photos in Graphic Design. Print production and layout in Adobe Indesign CC. Web production. Motion Graphic Production

GRAPHIC DESIGN II Grades 10-12 CCR

Students will have a secondary level understanding of digital photography, content creation, and graphic design, including but not limited to fundamental and advanced functions of a DSLR camera, applying their understanding of the elements and principles of composition to craft photographs and design work. Technical applications in Adobe Photoshop CC and Adobe Illustrator with a peek into Adobe After Effects. Focus will be on print production and layout, typography and the design process. Students will include a capstone project in their final project portfolio based on their learning in both photography and graphic design production.

Symphonic Band Grades 9-12 2 Credit CCR

In this course, students will be continuing their growth as an instrumental musician with the aid and understanding of technique, theory, tone quality, evaluation, and the collaboration of social aspects through performance and assessments. Advanced instrumental music literature will be explored for competition, community service, school pride and lifelong skills of enjoyment. Advancement in musicality, individually as well as an ensemble, is the backbone of the course. The year is divided into several seasons, marching (field shows and parades), concerts (school, festivals, and competitions), small ensembles and solos. Each year individual growth as an instrumental musician can be attained.

Students are encouraged to audition for state festivals. Students will be assigned a uniform that is used for concert and marching performances. There is a one-time (unless either needs to be replaced) of \$35 shoe fee and \$8 method book fee of which students keep both. There is no rental fee for the large nontraditional instruments that are only offered to advanced students. There is no cleaning fee for uniforms.

This class may be taken multiple times for additional credit. *Prerequisite: Students must have either:*

-  Played a band instrument and completed two levels of instrumental music by the end of eighth grade through a middle school band program at Standards of Excellence, Levels 1 and 2
-  Taken private lessons by a certified music educator completing the two levels listed previously
-  Previously been enrolled in band in high school

Jazz Band Grades 10-12 1/2 Credit CCR

In this course, you will explore the style of jazz as well as swing, bebop, fusion, rock, and improvisation. With the aid and understanding of technique, theory, tone quality, evaluation, and the collaboration of social aspects through performance and assessments, you will grow and advance in jazz literature. Performance opportunities include competition, community service, school pride and lifelong skills of enjoyment. Advancement in musicality, individually as well as an ensemble, is the backbone of the course.

Each year individual growth as an instrumental jazz musician can be attained. The ensemble and individual students will be given opportunities to grow through competitions and festivals. Students are encouraged to audition for these state festivals. Therefore, this class can be taken additional times and students will have the option to advance to an Honors Level. Students will be required to wear all black concert attire. There is a \$20 jazz shirt fee of which students keep the shirt. This is a one time fee unless the shirt needs to be replaced.

This class may be taken multiple times for additional credit.

Prerequisite: The student must be enrolled in Band and play a jazz instrument.

Mixed Chorus Grades 9-12 1 credit CCR

In this course, students will be given the opportunity to explore vocal music through choral singing and grow as a vocal musician with the aid and understanding of technique, theory, tone quality, evaluation, and the collaboration of social aspects through performance and assessments. Opportunities to perform include concerts for community service, school pride and the lifelong skills of enjoyment. Advancement in musicality, individually as well as an ensemble, is the backbone of the course. Each year offers advancement and growth for every student. Therefore, this class can be taken additional times. Students will be required to wear the traditional black and white concert attire.

Concert Choir Grades 10-12 1/2 Credit CCR

In this course, you will be continuing your growth as a vocal musician with the aid and understanding of technique, theory, tone quality, evaluation, and the collaboration of social aspects through performance and assessments.

Advanced choral music literature will be explored for competition, community service, school pride and lifelong skills of enjoyment. Advancement in musicality, individually, as well as an ensemble is the backbone of the course. Each year individual growth as a vocal musician can be attained. The year is divided into several seasons, concerts (school, festivals, and competitions), small ensemble and solos. Each year individual growth as a vocal musician can be attained.

Students are encouraged to audition for state festivals. Therefore, this class can be taken additional times and students will have the option to advance to an Honors Level. Students will be required to wear the traditional black and white concert attire as well as receive a tux or gown for competitions and performances. There is a \$35 shoe fee of which students retain. This is a one time fee unless the shoes need to be replaced. There is no cleaning fee for tuxedos and gowns. *Prerequisites: The student must be enrolled in Mixed Chorus and pass an audition requirement which assesses pitch, tone quality, solfège, and rhythm counting. This audition is held in January for the following school year.*

History of Rock and Roll & Hip Hop Grades 9-12 1 credit CCR

History of Rock and Roll and Hip Hop Is a Fine Arts course that offers a look into Music through the different decades of music starting with the Birth of Rock in the 1950s as well as the evolution of Jazz Music. Throughout the course we will learn about the different genres of music that evolved over the years since the birth of rock. We will also spend time learning about different bands and musicians that played an iconic role into the development of music over the years. Students will have many opportunities throughout the course to showcase their learning through projects in each decade of music. During this class we will also have a unit on the basics of playing the guitar. Students will learn simple chords as well as fingerstyle. We have school guitars available.

Woodworking Grades 9-12 1 credit CCR

This course is an introduction to the basics of general woodworking. Students will learn workplace/shop safety, common woodworking joinery, hand tool/machine parts identifications, and proper use. Students will create (one) whole class project, then choose an individual project to create, plan, and complete. Class will work collaboratively to produce a manufacturing project using the manufacturing model. All "Portrait of a Graduate" competencies will be challenged.

Woodworking II Grades 9-12 1 credit CCR

This course is an advanced woodworking course that requires a Woodworking I prerequisite as well as instructor approval. Students will learn advanced woodworking joinery, wood burning, and laser engraver technology, review workplace/shop safety, machine parts and identification, and proper use. Students will create (one) whole class advanced joinery project, then choose an individual project to create, plan, and complete. Each individual project will require planning materials cost, approximate timeframe to complete, marketing for product, as well as sale price/profit margin estimating. Class will work collaboratively to produce a manufacturing/community based project using the manufacturing model. All "Portrait of a Graduate" competencies will be challenged.

English

Level	Freshman Year	Sophomore Year	Junior Year	Senior Year
Foundations	Freshman Seminar	English 10	Foundations English 11	Foundations English 12
CCR		English 10	American Literature	College Composition Media Literacy Creative Writing
Honors		AP Seminar	Honors American Literature	
AP		AP Seminar	AP Seminar	AP Literature and Composition

English 9 Seminar Grade 9 2 credits Full Year

Given that literacy is an important foundation for student success at the high school level, students will learn literacy techniques and strategies that apply to all content areas. Along with this work, students will use literacy skills to study and practice the 6 Portrait of a Graduate skills. Students will also explore the Essential Questions: *What is my relationship with literature?* and *What makes me unique?* Students will establish personal connections with literature, determine a theme or central idea, and analyze complex characters through guided readings of canonical texts, such as George Orwell’s *Animal Farm*. The semester will focus on human characteristics - looking at what shapes our core values, how we see and communicate with others, and what drives our decision making. Students will develop and strengthen writing as needed by planning, editing, and revising both critical analyses and narrative reflections. Students will begin their preparation for the SAT through focused instruction regarding, writing, and language skills and the English Department’s scaffolded vocabulary program.

English 9 Seminar used to build a school-wide academic culture through studying reading and writing for all content areas, study skills, time management, organization, etc. Students will be allowed to contract for Honors credit. NWEA scores will be used as a determining prerequisite. This course earns ONE credit towards NCAA eligibility.

English 10 Grade 10 1 credit F/CCR

In the course, students will explore the English Department’s 10th Grade Essential Question “What is the purpose of critical thinking?” Students will apply critical thinking skills to deconstruct complex texts and analyze the author’s choice of structure through guided readings of canonical texts, such as Ray Bradbury’s *Fahrenheit 451* and William Golding’s *Lord of the*

Flies. Students will produce clear, coherent writing, in which development, organization, and style are appropriate to task, purpose, and audience in both thesis papers and narrative reflections. Students will continue their preparation for the SAT through focused instruction regarding “SAT Writing & Language” skills and the English Department’s scaffolded “Wordly Wise” vocabulary program. This course earns ONE credit towards NCAA eligibility.

AP Seminar Grades 10-11 1 credit AP

AP Seminar is an interdisciplinary course that challenges students to investigate real-world issues from various perspectives, fostering skills in research, analysis, and argumentation. Students explore their own questions to develop key skills like critical thinking, collaboration, and communication, both in written and oral forms. Throughout the semester, students complete a team project, an individual research-based paper, and a multimedia presentation. These activities are aimed at helping students synthesize information, evaluate multiple viewpoints, and construct evidence-based arguments. Students choosing to do so will then take the English 10: AP Seminar test to assess their skills. Students who successfully complete the full year of study and score a 3 or higher on the AP Seminar performance assessment and exam will earn an AP credit through the College Board that may fulfill an elective credit at a post secondary institution.

Foundations English 11 Grade 11 1 credit F

Foundations of English 11 is systematically structured to ensure consolidated instruction in reading development, study skills, and life skills. Emphasis on visual and oral characteristics of words, using a variety of teaching materials and techniques are hallmarks of this program. The reading strategies are presented in small groups and/or individualized instruction. The program is diagnostic and prescriptive, with the development of speaking, writing, and reading relationships. The classroom environment promotes and encourages a positive attitude toward reading in conjunction with fostering the improvement of self image. The reading material, in-class writing assignments, and classroom activities are also geared toward developing life skills. Materials include learning how to read cookbooks and recipes, medicine labels, newspapers, job applications, job postings, etc. Enrollment will be limited and determined by standardized reading test scores.

CCR American Literature Grade 11 1 credit CCR

In this course, students will explore the English Department’s 11th Grade Essential Question “What does it mean to be an American?” Students will apply critical their critical thinking skills to understand the complexities of cultural identity and to examine different authors’ approaches to similar themes in America’s canonical texts, such Mark Twain’s *The Adventures of Huckleberry Finn*, F. Scott Fitzgerald’s *The Great Gatsby*, and Arthur Miller’s *Death of a Salesman*. Students will produce persuasive arguments with evidence supporting a thesis and narrative reflections with details from multiple sources. Students will continue their preparation for the SAT through focused instruction regarding “SAT Essay” strategies, “SAT Writing & Language” skills, and the English Department’s scaffolded “Wordly Wise” vocabulary program. This course earns ONE credit towards NCAA eligibility.

Honors American Literature Grade 11 1 credit H

In this course, students will explore the English Department's 11th Grade Essential Question "What does it mean to be an American?" Students will apply their critical thinking skills to understand the complexities of cultural identity and to examine different authors' approaches to similar themes in America's canonical texts, such as Mark Twain's *The Adventures of Huckleberry Finn*, F. Scott Fitzgerald's *The Great Gatsby*, and Arthur Miller's *Death of a Salesman*. Students will produce persuasive arguments with evidence supporting a thesis and narrative reflections with details from multiple sources. Students will continue their preparation for the SAT through focused instruction regarding "SAT Essay" strategies, "SAT Writing & Language" skills, and the English Department's scaffolded "Wordly Wise" vocabulary program. Students are expected to produce regularly critical analyses and to engage routinely in rich, relevant student-driven classroom discussions. This course earns ONE credit towards NCAA eligibility.

Honors College Composition Grades 11-12 1 credit H

In this course students learn to write clearly and effectively for defined audiences through a variety of strategies. Emphasis is on the writing process from pre-writing through drafting, revising and editing. Formal essays and a research paper are required. This course will also help prospective college students understand the steps that need to be taken in order to apply and get ready for college. Topics that will be covered will include the terminology that is used in reference to college life, the college search process, college major/degree programs and the college application process. The course will also cover selected novels, poetry and short fiction from American and British Literature, as well as the significant writing of descriptive, narrative and expository essays for students planning to attend college. This course is offered for Project Running Start credit. This course earns ONE credit towards NCAA eligibility.

Creative Writing Grades 11-12 1 credit CCR

Students in this writing course will examine different genres: poetry, fiction, memoir, and nonfiction. Students taking this course will be expected to write intensively as they move through each genre studied. In addition to writing, students will be expected to read and examine poems, short stories, novels, and nonfiction writing. Each student will be responsible for creating a portfolio of original work with a goal of submitting revised pieces for publication. This course is a writing course supplemented by full texts and excerpts of memoirs, as well as articles about memoir. Students enrolled in the class will write extensively, the final assessment being a portfolio of personal writing and a polished piece of memoir. Students will learn to appreciate and write poetry in a variety of closed forms, including the sonnet, villanelle, sestina, ballad, and haiku, and will also explore the open form of free verse. Students will read poets from the 16th century through the present, and will examine how their use of imagery, word order, tone, diction, sound devices, and symbols can augment meaning. Students will produce a final portfolio of original work which primarily will focus on their own poetry, but will also include some analysis of the poetry they have studied. Other assessments may include tests and quizzes. This course earns ONE credit towards NCAA eligibility.

Media Literacy Grades 11-12 1 credit CCR

This course will help students develop from passive consumers to critical readers of mass media. Students will study film, animation, print media (newspapers and magazines), advertising, internet, social media, television, and radio, with a goal of understanding how each employs specific formats for specific purposes, how persuasive strategies are employed with a variety of target audiences, and how media messages are constructions which do not necessarily represent the truth. Media literacy is designed to help students develop an informed and critical understanding of the nature of an ever expanding and increasingly dominating mass media –as information sources, as entertainment, and as an industry—as well as to examine, interpret, and evaluate the messages contained within, and their social, cultural and political implications. Students will be required to read and view analytically and will themselves utilize a variety of media to conventions.

Foundations English 12 Grade 12 1 Credit F

Foundations of English 12 is systematically structured to ensure consolidated instruction in reading development, study skills, and life skills. Emphasis on visual and oral characteristics of words, using a variety of teaching materials and techniques are hallmarks of this program. The reading strategies are presented in small groups and/or individualized instruction. The program is diagnostic and prescriptive, with the development of speaking, writing, and reading relationships. The classroom environment promotes and encourages a positive attitude toward reading in conjunction with fostering the improvement of self-image. The reading material, in-class writing assignments, and classroom activities are also geared toward developing life skills. Materials include learning how to read cookbooks and recipes, medicine labels, newspapers, job applications, job postings, etc. Enrollment will be limited and determined by standardized reading test scores.

AP Literature and Composition Grade 12 2 credit AP

According to the Course Description, “An AP English Literature and Composition course engages students in the careful reading and critical analysis of imaginative literature. Through the close reading of selected texts, students deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read, students consider a work’s structure, style and themes, as well as such smaller-scale elements as the use of figurative language, imagery, symbolism and tone.” A variety of works from primarily Western authors will be the focus of the course. Reading will be extensive and demanding. Students will also be asked to write to develop: “a wide-ranging vocabulary used with denotative accuracy and connotative resourcefulness; a variety of sentence structures, including appropriate use of subordinate and coordinate constructions; a logical organization, enhanced by specific techniques of coherence such as repetition, transitions and emphasis; a balance of generalization with specific illustrative detail; and an effective use of rhetoric, including controlling tone, maintaining a consistent voice, and achieving emphasis through parallelism and antithesis.” Writing assignments will be frequent and rigorous, focusing on analysis, synthesis, and rhetorical strategies. Students will be prepared to take the AP Literature and Composition national exam after taking this course and Honors American Literature. (AP course offerings are determined on an annual basis). This course earns ONE credit towards NCAA eligibility.

Math

Level	Freshmen Year	Sophomore Year Junior Year	Senior Year
Foundations	Fundamentals of Math Algebra Foundations Integrated 1	Integrated 2 Math in Motion	
CCR	CCR Algebra 1A CCR Algebra 1B	CCR Geometry CCR Algebra 2	
Honors/AP	Honors Algebra 1B Honors Geometry	Honors Algebra 2 Honors Pre-Calculus AP Statistics/AP Calculus	
Electives	CCR Statistics & Probability Honors Pre-Calculus Math Applications AP Statistics Honors Calculus AP Calculus Financial Math Formula 1		

Fundamentals of Math Grade 9 1 credit F

Fundamentals of Mathematics will build and reinforce skills in the content of numerical operations within the Real Number System, and applications of these skills in real world situations. Students will develop numeracy skills to expand their understanding of mathematical concepts and critical thinking; exercising reading comprehension by means of applying new knowledge and skills to solve real world problems. Students will be assessed through a variety of formative and summative assessments including writing for understanding. The pace of the class will be appropriate for allowing students to achieve mastery of mathematical concepts and skills for subsequent math classes. Fundamentals of Math provides the mathematical foundation upon which subsequent studies in mathematics and other areas depend.

Algebra Foundations Grade 9 1 credit F/CCR

This course is to serve as a bridge between elementary mathematical skills and Algebra. It is designed for students to build and reinforce basic computation skills, solving two step problems with real numbers for all four mathematical operations, ratios and proportions, solving one and two step equations/inequalities with one variable, and extending into algebraic functions, linear equations and systems. Students will develop numeracy skills to expand their understanding of mathematical concepts and critical thinking, as well as, exercise reading comprehension by means of applying new knowledge and skills to solve real world problems. Students will be assessed through a variety of formative and summative assessments including writing for understanding. The pace of the class will be appropriate in allowing students to achieve mastery

of mathematical concepts and skills for Algebra 1 math classes.

Integrated Math 1 Grade 9 1 credits F

Integrated 1 is the first section of a three-class high school mathematics sequence. Students will develop numeracy skills to expand their understanding of mathematical concepts and critical thinking, as well as, exercise reading comprehension by means of applying new knowledge and skills to solve real world problems. Students will be assessed through a variety of formative and summative assessments including writing for understanding. This class will integrate concepts from the four Common Core strands; Number Theory, Algebra, Geometry, and Probability and Statistics.

CCR Algebra 1A/1B Grade 9 2 credits CCR

Students in this course will develop problem-solving skills through units of algebra, statistics and introductory geometry. The main algebraic concepts include functions, relations, solving equations and inequalities, organizing data, and analyzing patterns. Each unit will have a focus on solving word problems and reading carefully, to build skills in context as well as building skills from practice. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. This course will meet the NH state requirement for Algebra. Some geometry concepts will be previewed to assist in developing geometry skills for the following year. This course earns ONE HALF credit towards NCAA eligibility.

Honors Algebra 1B Grade 9 1 credit H

Students in this course will develop problem-solving skills through units of algebra, statistics and introductory geometry. The main algebraic concepts include functions, relations, solving equations and inequalities, organizing data, and analyzing patterns. The culminating focus of each unit is on solving word problems and reading carefully, and thus the building of algebra skills is incorporated into the necessity to solve problems in a context, rather than from drill and practice. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. This course will meet the NH state requirement for Algebra. Some geometry concepts will be previewed to assist in developing geometry skills for the following year. *Prerequisite: Algebra 1A.* This course earns ONE HALF credit towards NCAA eligibility.

Integrated Math 2 Grade 10 1 credit F

Students in this course will build a stronger math foundation based on the competencies of Foundations 9. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. The course curriculum will be student centered and developed through use of pretesting to determine student needs. Concepts are introduced in an appropriate manner and pace, with time for development of understanding of the branches of mathematics. The course topics will include numbers and operations, problem-solving skill development using real-world and non-routine problems, reading and analyzing word problems, and basic Algebra and Geometry skills. Students will be assessed using a variety of methods including performance based applications, daily formative assessments, and exams. *Prerequisite: Integrated Math 1A & 1B*

CCR Geometry Grade 10 1 credit CCR

Students in this course will study geometric figures, congruence, similarity, transformations, trigonometry, coordinate geometry, circles, area and volume with an emphasis on proper communication of mathematics. This course provides a thorough development of reasoning skills and includes informal and formal proof, while emphasizing the connection between geometry and the physical world. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. Students will be required to use a variety of mathematical tools such as compasses, rulers, protractors, and progressive software. Student assessments will include writing proofs using mathematical logical statements and justifications, performance-based application problems, and exams. *Prerequisite: Algebra 1A & 1B.* This course earns ONE credit towards NCAA eligibility.

Honors Geometry Grade 9-10 1 credit H

Students will study Geometry with a focus on geometric figures, congruence, similarity, transformations, trigonometry, coordinate geometry, circles, Area and volume with an emphasis on proper communication of mathematics. This course provides a thorough development of reasoning skills and includes informal and formal proof, while emphasizing the connection between geometry and the physical world. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. Rigorous and complex problems and proofs will be solved and/or explained. Students will be required to use a variety of mathematical tools such as compasses, rulers, protractors, and progressive software. Student assessments will include writing proofs using mathematical logical statements and justifications, performance-based application problems, and exams. *Prerequisite: Algebra 1A & 1B.* This course earns ONE credit towards NCAA eligibility.

Math in Motion Grade 11 1 credit F

Mathematical models are essential to provide a framework for understanding decision making in nearly every aspect of life ranging from the timing of traffic lights to the control of the spread of disease, resource management, and sports. This course provides an introduction to modeling through in-depth discussions of a series of examples and hands-on exercises and projects that make use of a range of mathematical tools. Math in Motion is a semester-long high school math course preparing students for mathematical situations that will be encountered in life. Students will be exploring the major topics (number theory, algebra, geometry, probability and statistics) throughout. This course will conclude with a final assessment (project). *Prerequisite: Geometry or Integrated 2.*

CCR Algebra 2 Grade 10-11 1 credit CCR

Students will study Algebra 2 with a focus on linear programming, three variable systems of equations, matrices, complex numbers, polynomial functions, function operations, inverse functions, and quadratic functions. This course provides a thorough development of functions and will deepen the understanding of the structure of algebraic topics through teacher-led discussions and independent reading. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. Students will be required to use a graphing calculator. Student assessments will include performance based assessments, real-world

application problems, and exams. *Prerequisite: Algebra 1A & 1B.* This course earns ONE credit towards NCAA eligibility.

Honors Algebra 2 Grade 10-11 1 credit H

Students will study Algebra 2 with a focus on linear programming, three variable systems of equations, matrices, complex numbers, polynomial functions, function operations, inverse functions, logarithmic functions, conic sections, and sequences and series. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. This course provides a thorough development of functions and will deepen the understanding of the structure of algebraic topics through teacher-led discussions and independent reading. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. Students will be required to use a graphing calculator. Students will work towards solving highly complex problems to lay the foundation for Precalculus and Calculus. Student assessments will include performance based assessments, real-world application problems, and exams. *Prerequisite: Algebra 1A & 1B, Geometry.* This course earns ONE credit towards NCAA eligibility.

CCR Statistics and Probability Grade 10-12 1 credit CCR

This college level course is designed to provide students with a foundation of elementary statistics for college or career. Previous course competencies will be built on and it is the expectation that the knowledge and skills have been retained. Topics include organizing numerical data, frequency distributions, probability of events, random variables, binomial and normal distributions, the Central Limit Theorem, estimation and hypothesis testing, graphical analysis, correlation, and regressions. Emphasis is on applications from areas of economics and science. Students are required to read and write arguments typically used in the decision making process for business and pharmaceutical studies. *Prerequisite: Algebra 2.* This course earns ONE credit towards NCAA eligibility.

Honors Pre-Calculus Grade 11-12 1 credit H

The primary goal of this course is to provide students with the required skills and understandings for further study in mathematics, particularly calculus, at the high school and college level. Previous course competencies will be built on, and it is the expectation that the knowledge and skills have been retained. Topics covered will include polynomial, rational and trigonometric functions and their graphs, trigonometry and the unit circle, trigonometric equations and identities, composite and inverse functions, polar coordinates and complex numbers, and an introduction to calculus. Modeling real world data and the use of graphing calculators is an integral part of the course. Reading the textbook for understanding will be emphasized throughout the course. This course is also offered as a Running Start course. *Prerequisite: Honors Algebra 2.* This course earns ONE credit towards NCAA eligibility.

Honors Calculus Grade 12 1 credit H

This college level course is designed for the student who has a strong math background. Previous course competencies will be built on and it is the expectation that the knowledge and skills have been retained. Topics include functions, limits, continuity, slope/rate of change, derivatives, integrals, and techniques of elementary differential and integral calculus. Applications are

aimed at providing students with a preparation for business, life science, and engineering study at a higher level. Taken from topics in trigonometry, exponential and logarithmic growth and decay, problems will require students to read and interpret data from real-world problems. This course covers many of the topics necessary in preparation for the Advanced Placement Calculus AB Exam. *Prerequisite: Honors Pre-Calculus* (AP course offerings are determined on an annual basis). This course earns ONE credit towards NCAA eligibility.

AP Calculus Grade 12 1 credit AP

This college level course is designed for the student who has a working knowledge of differentiation and basic integration. Previous course competencies will be built on and it is the expectation that the knowledge and skills have been retained. Topics include advanced integration techniques of trigonometric, exponential, and logarithmic functions, inverse functions. Also included is the study of areas, volumes, and arc length formed by solids of revolution, slope fields, and sequences and series as they relate to functions. Applications are again aimed at providing students with a preparation for business, life science, and engineering study at a higher level. Students will be required to read and interpret data from real-world problems as well as create models of different solids for complete written physical analysis. This course completes the coverage of topics necessary in preparation for the Advanced Placement Calculus AB or BC Exam. *Prerequisite: Honors Calculus.* (AP course offerings are determined on an annual basis). This course earns ONE credit towards NCAA eligibility.

AP Statistics Grade 10-12 1 credit AP

According to the AP Statistics Course Description that went into effect in Fall of 2010: “The purpose of the AP course in statistics is to introduce students to the major concepts and tools for collecting, analyzing and drawing conclusions from data. Students are exposed to four broad conceptual themes:

1. Exploring Data: Describing patterns and departures from patterns
2. Sampling and Experimentation: Planning and conducting a study
3. Anticipating Patterns: Exploring random phenomena using probability and simulation
4. Statistical Inference: Estimating population parameters and testing hypotheses

Students who successfully complete the course and exam may receive credit, advanced placement or both for a one semester introductory college statistics course. This does not necessarily imply that the high school course should be one semester long. Each high school needs to determine the length of its AP Statistics course to best serve the needs of its students. (AP course offerings are determined on an annual basis). This course earns ONE credit towards NCAA eligibility.

Financial Math Grade 12 1 credit CCR

This course is designed for students to build a strong foundation in basic math and financial matters, while building connections of algebra and managing money, to help understand and gain confidence in finance in mathematical terms. During this course students will perform operations with whole numbers, fractions, decimals, and percent. In addition, they will gain a greater understanding of the financial issues that affect their life now; such as budgeting, understanding

paychecks, and choosing a credit card. Students will also be introduced to topics that they will encounter in the years to come as they finish school and enter the workforce; mortgages, investing, and saving for retirement. As students embark on life in the 21st century, they will be required to use mathematics frequently in their daily life to make crucial financial decisions that will affect lifestyles. Overall, this class offers a unique approach of teaching basic mathematics through financial literacy.

Formula 1 Grades 9-12 2 credits CCR

F1 in Schools disrupts conventional learning and inspires students through a hands-on, fun, exciting, creative - yet challenging - STEM program. The year-long Formula 1 (F1) In Schools program provides students with an integrated, math-based skill set that is the steppingstone to amazing STEM based opportunities. Students will work in collaborative teams on a capstone project that includes designing, manufacturing, and testing a formula 1 race car, as well as the branding and marketing of their team. The course culminates in an actual Formula 1 race!

Physical Education and Health

Topic	Freshman Year	Sophomore Year	Junior Year	Senior Year
Physical Education	PE Weight Training Exercise & Nutrition Contemporary Trends in Fitness	Elective		
Health	Wellness	Human Growth and Development		

Wellness Grade 9 1 credit CCR

This course is a combination of lifetime fitness activities and health education. Learning will focus on healthy living and life-style choices, self-management, healthy nutritional and consumer choices, and the impact exercise has on functional health. Students will be assessed on their written work, self-assessment and activity records, personal fitness plans, reading and discussion from Fitness for Life text, projects, and participation. The class is designed to help all learners become informed, independent decision makers capable of planning for enjoyable lifetime fitness and physical activity, while at the same time achieving personal fitness and activity goals for the present. Students will participate in Red Cross First Aid and CPR certification. A credential from the Red Cross will be issued upon successful completion.

Physical Education Grade 9-12 1 credit CCR

This course will be designed for students to develop fundamental skills, basic knowledge and rules on a variety of team recreational activities such as: soccer, flag football, volleyball, softball, team handball, floor hockey, speedball, ultimate Frisbee, and basketball as well as individual and dual activity sports such as: archery, golf, badminton, bocce and croquet. A flexibility and fitness component will be included in conjunction with the activities. Students will be assessed with a daily participation rubric on their individual ability, effort and their ability to work with others. Participation in a daily fitness program offered in the class will provide students with a foundation for lifetime fitness. This class may be taken multiple times for additional credit with the approval of the department head.

Weight Training Grade 9-12 1 credit CCR

This course is designed for students interested in developing/participating in a personal fitness program. Students will spend time in the weight room and the gym. The goal of the class will be for the students to see an improved physical fitness level over the semester. This class may be taken multiple times for additional credit with the approval of the department head.

Exercise and Nutrition Grades 9-12 1 credit CCR

This course promotes improving your overall health through developing a fitness and nutrition

program. The Exercise and Nutrition course will concentrate on nutrition, diet, metabolism and the energy required for all metabolic reactions needed to maintain a healthy and efficient body. Some of the topics covered in this class are the basic principles of fitness and the importance of regular exercise, the benefits of aerobic moderate exercise, diet fads, concepts of weight control through nutrition, the digestive system, and vital nutrients and vitamins. Students will also regularly participate in wellness activities and fitness testing to better understand the relationship between nutrition and an active lifestyle. At the conclusion of this program students will understand how to set goals with the intent of preserving and expanding opportunities for healthful, enjoyable physical activity and nutrition practices.

Contemporary Trends in Fitness Grades 9-12 1 credit CCR

Students will examine useful concepts that will help them understand the importance of being active and taking care of themselves through a variety of movements and physical activities. After receiving an introduction to physical fitness and how to stay safe and injury-free during exercise, students will explore the fundamentals of fitness through various aerobic, muscular, and flexibility activities with a particular emphasis placed on the connection of mind and body. The use of digital technology to enhance the exercise experience will also be a topic of focus.

Human Growth & Development Grades 10-12 1 credit CCR

Advanced Health is a class that links students to influential persons, scholarly articles and other texts, and experiences that affirm and reinforce health-promoting attitudes, positive relationships with peers, values, beliefs, and behaviors. Students will have substantial time and opportunity to review or apply new knowledge. Students will read health related media articles daily and in addition will read *The Absolute Diary of a Part Time Indian* by Alexie Sherman and *Ora's Boy* by James Novak. These two books depict the lives of young adults coming of age in difficult situations that overcome adversity and clearly demonstrate personal resiliency. Instructional strategies will place emphasis on protective factors that promote healthy behaviors and enable students to avoid or reduce health risk behaviors by engaging peers, parents, families, and other positive adult role models in the student learning. Human Growth and Development builds on previously learned concepts and skills and provides opportunities to reinforce health-promoting skills to achieve longer-lasting results. *Prerequisite: Wellness.*

Science

Levels	Freshman Year	Sophomore Year	Junior and Senior Year
Foundations	Physical Science	Biology	Elective
CCR	Physical Science	Biology Chemistry	Elective
Honors/AP	Biology	Chemistry	Elective
Electives	Anatomy & Physiology Astronomy Forensic Science Earth and Space Environmental Science Communiversy Science (Environmental) Honors Physics Honors Physics 2 BioMed/AP Bio (Huot offering)		

Foundations Physical Science Grade 9 1 credit CCR

The concept of matter and its properties and changes along with energy, forces and motion will be investigated in an activity-based fashion. This course explores the fundamental laws and theories of chemistry and physics. The developing fundamental skills of literacy and numeracy will be emphasized.

CCR Physical Science Grade 9 1 credit CCR

The concept of matter and its properties and changes along with energy, forces and motion will be investigated in an activity-based fashion. This course explores the fundamental laws and theories of chemistry and physics. *Prerequisite: Algebra 1A & 1B, which may be taken concurrently.* This course earns ONE credit towards NCAA eligibility.

Foundations Biology Grade 10 1 credit F

This course investigates areas of biology such as ecology, cell biology, genetics, and evolution. This course is activity directed and students are expected to participate in indoor laboratory activities as well as outdoor ecological field studies with guidance from the teacher. This is a lab-oriented course in which students are expected to participate in numerous investigations, some of which are dissection based.

CCR Biology Grade 10 1 credit CCR

This course investigates areas of biology such as ecology, cell biology, genetics, and evolution. This course is activity directed and students are expected to participate in indoor laboratory activities as well as outdoor ecological field studies. This is a lab-oriented course in which students are expected to participate in numerous investigations, some of which are

dissection-based. Students will be expected to read and problem-solve complex problems and texts. This course earns ONE credit towards NCAA eligibility.

Honors Biology Grades 9-10 1 credit H

This course investigates areas of biology such as ecology, cell biology, genetics, and evolution. This course is activity directed and students are expected to participate in indoor laboratory activities as well as outdoor ecological field studies. This is a lab-oriented course in which students are expected to participate in numerous investigations, some of which are dissection-based. Students will be expected to read complex texts and problem-solve independently. *Prerequisite: Algebra IA & B, which may be taken concurrently.* This course earns ONE credit towards NCAA eligibility.

CCR Chemistry Grades 10-11 1 credit CCR

The aim of this course is to treat the topic of matter through elementary theory and descriptive information. Focus is placed on application of principles through hands-on activities and laboratory experimentation. Students will be expected to integrate what is read and learned into lab and inquiry based activities. *Prerequisite: Algebra IA & IB, Physical Science and Biology* This course earns ONE credit towards NCAA eligibility.

Honors Chemistry Grades 10-11 1 credit H

The aim of this course is to treat the topic of matter through elementary theory and descriptive information. Focus is placed on application of principles through hands-on activities and laboratory experimentation. Students will be expected to integrate what is read and learned into lab and inquiry based activities. Successful completion of this course will allow a student to take Advanced Placement Chemistry. *Prerequisite: Honors Algebra IB and Biology.* This course earns ONE credit towards NCAA eligibility.

Topics in A&P Grades 10-12 1 credit CCR

Have you ever wondered how a person survives in the death zone of Mount Everest or the depths of the Mariana Trench? How does addiction and mental health affect the function of your body systems? What can we do to better protect the health of amateur and professional athletes who participate in heavy contact sports? *Topics in Anatomy* is an application based course that blends the core concepts of Anatomy and Physiology with genuine human experiences and major life events. We will explore subjects such as traumatic brain injuries, heart disease, exercise & nutrition, violent crimes, wilderness survival, and more while tying together the *medical/physiological, social and cultural impacts* of each. This course involves hands-on, lab based activities including dissection of various organs and organisms and students are expected to participate fully.

Honors Anatomy & Physiology Grades 10-12 1 credit H

The course examines the biological concepts of structure and function of the human body. Body systems, such as the cardiovascular, respiratory, nervous, digestive, muscular, skeletal and reproductive will be surveyed. Principles of basic chemistry, cell and tissue studies, and a rigorous examination of all the major body systems will be included. Intensive lab exercises will include microscopic analyses of various body tissue types, online research relating to current

medical and biotechnological issues, and a mandatory, in-depth dissection of a fetal pig. *Prerequisite: Physical Science and Biology.* This course earns ONE credit towards NCAA eligibility.

Earth & Space Science Grades 11-12 1 credit CCR

Earth and Space Science involves the study of Earth and its place in the universe. Earth and Space Science is an interdisciplinary study involving aspects of astronomy, geology, meteorology, oceanography, biology, environmental science, chemistry, and physics. Outdoor activities are a weekly component of this course. *Prerequisite: Physical Science and Biology.* This course earns ONE credit towards NCAA eligibility.

Forensic Science Grades 11-12 1 credit CCR

Forensic Science will explore the scientific methods of investigating a crime scene. The course is designed to challenge students through analyses of biological evidence that includes trace evidence, DNA, fingerprints, hair and fibers, body fluids, soils, and handwriting. Students will also learn about careers involved with Forensic Science and will play mock roles as experts in the field to solve crimes. Students will collaborate in solving mock crime scenes using a variety of tools and laboratory skills. This will allow students to successfully interpret data and develop techniques involved in the analysis of biological evidence. *Prerequisite: Physical Science and Biology.* This course earns ONE credit towards NCAA eligibility.

Honors Physics Grades 11-12 1 credit H

This course deals with the mechanics of Physics. Topics to be addressed include motion, forces, momentum, energy and heat. This will be done through lecture, discussions and laboratory investigations. Students will participate in rigorous inquiry-based learning activities and be expected to independently draw conclusions. A solid math background is highly recommended. *Prerequisite: Biology, Chemistry, and Honors Algebra 2. Pre-Calculus (Highly recommended and may be taken concurrently).* This course earns ONE credit towards NCAA eligibility.

Honors Physics 2 Grades 11-12 1 credit H

Students will build on their knowledge and skills from Honors Physics and explore new topics in this class. Light, sound, electricity and magnetism are the topics that will be explored through the use of lecture, discussions and laboratory activities to give students a knowledge and appreciation of these 20 aspects of Physics. Students will complete investigative and inquiry-based learning activities and be expected to draw conclusions using the scientific method. Reading and problem-solving is complex. A solid math background is highly recommended. *Prerequisite: Honors Physics and Honors Algebra 2. Pre-Calculus (Highly recommended and may be taken concurrently).* This course earns ONE credit towards NCAA eligibility.

Environmental Science Grades 10-12 1 credit CCR

This course will provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them.

Environmental science is interdisciplinary; it embraces a wide variety of topics from different areas of study, including current topics. At the end of the year, students are encouraged to take the Advanced Placement examination, which provides an opportunity for possible college credit. *Prerequisite recommended: Chemistry, Algebra 1A & 1B and Biology.* This course earns ONE credit towards NCAA eligibility.

Bio-Medical Technology/AP Bio Grades 10-12 1 credit H

See Huot Program of Studies for course/program information.

World Geography and Cultures Grade 9 1 credit F/CCR

This course will explore the relationship between people around the world and the physical environment as well as the uniqueness and commonalities of cultures around the world. Students will be expected to demonstrate proficiency in reading maps and data tables. Students will be expected to show competence in various methods of argument. There will be major projects and essays. The major goal of this course is for students to learn about various regions of the world and people in them. This course will explore the relationship between people around the world and the physical environment as well as the uniqueness and commonalities of cultures around the world. Students will be expected to demonstrate proficiency in reading maps and data tables. The major goal of this course is for students to learn about various regions of the world and the people in them. Students will be expected to read, write, and problem solve independently, as well as participate in class discussions. This course earns ONE credit towards NCAA eligibility.

Criminology Grades 10-12 1 credit F/CCR

In today's society, crime and deviant behavior are often among the top concerns of society members. From the nightly news to personal experiences with victimization, crime seems to be all around us. This course provides an in-depth exploration of criminology and victimology, examining the causes of criminal behavior, the societal response to crime, and the impact on victims. Through an interdisciplinary approach, students will analyze crime theories, offender profiles, and the legal systems addressing crime prevention and justice. By the end of the course, students will be equipped to critically evaluate criminal behavior and victimization trends, advocate for victim-centered policies, and understand the ethical considerations in criminal

justice practices.

US History Through Art and Culture Grades 10-12 1 credit CCR

In this course you will discover the political, economic and cultural impact of film in American history. You will see that movies and television have significantly influenced the course of our nation, often mirroring, predicting and even influencing political and legal changes in America and around the world. You will also consider the role of film in our modern economy, including the rise of global companies like CBS, Fox, Netflix, and Amazon. You will speculate on the future of cable television and movie theaters, both struggling to adapt to new streaming technologies and market competition. Students will also learn how film has been used as a powerful tool of cultural and social change, allowing people to speak out on the critical issues facing our world. This course meets the US History requirement. This course earns ONE credit towards NCAA eligibility.

US History Grades 10-12 1 credit F/CCR

This course is designed to provide students with the content knowledge and critical thinking skills for a deep understanding of United States history. The course begins with exploration and spans to the present period. Through in- depth study, students will learn to analyze and assess primary and secondary sources to help them interpret the past and understand the history of our nation from a variety of perspectives. The course strives to provide the student with the skill necessary to draw and communicate their own conclusions based on an understanding of the broad scope of American History and evidence. This course earns ONE credit towards NCAA eligibility.

American Government Grades 10-12 1 credit F/CCR

This course provides a foundational understanding of the United States government, its structures, and its functions. Students will explore the Constitution, the three branches of government, the rights and responsibilities of citizens, and the law-making process. Through class discussions, hands-on projects, and current event connections, students will develop a working knowledge of how the government impacts their daily lives. The course emphasizes civic engagement, critical thinking, and the importance of responsible citizenship. By the end of the course, students will have the tools to participate in the democratic process and understand how government decisions shape society. This course earns ONE credit towards NCAA eligibility.

Honors American Government Grades 10-12 1 credit H

This rigorous course challenges students to analyze the complexities of the United States government through an in-depth examination of constitutional principles, political systems, and policymaking. Students will engage in advanced discussions, case studies, and research-based projects that explore the historical development of government institutions and their evolving roles in society. Emphasis will be placed on critical thinking, debate, and evaluating diverse perspectives on governance. Students will be expected to apply their knowledge to contemporary political issues, assess the impact of landmark Supreme Court cases, and develop well-supported arguments on government policies. This course is designed for students who are ready to engage in a higher level of analysis and discourse in preparation for college-level studies. This course

earns ONE credit towards NCAA eligibility.

Economics Grades 10-12 1 credit F/CCR

This course introduces students to the fundamental principles of economics and personal finance. Students will explore key topics such as supply and demand, opportunity cost, economic systems, and the role of government in the economy. Practical applications, including budgeting, credit management, taxes, and financial planning, will prepare students for real-world financial decisions. Through discussions, real-life case studies, and hands-on activities, students will learn how economic choices impact individuals, businesses, and society. By the end of the course, students will have a foundational understanding of how the economy functions and how to make informed financial decisions. This course earns ONE credit towards NCAA eligibility.

Honors Economics Grades 10-12 1 credit F/CCR

This advanced course challenges students to analyze economic systems, market forces, and financial decision-making through a critical and analytical lens. Students will examine microeconomic and macroeconomic theories, explore globalization and trade, and assess the impact of economic policies on national and international economies. Topics such as entrepreneurship, investment strategies, and fiscal policy will be explored through data analysis, simulations, and research-based projects. Students will engage in debates, case studies, and problem-solving scenarios to deepen their understanding of economic principles. This course is designed for students who seek a rigorous, college-preparatory approach to economics and financial literacy. This course earns ONE credit towards NCAA eligibility.

Genocide Studies Grades 10-12 1 credit CCR/H

This course will examine the diplomatic, political, economic, social causes and ramifications of the World Wars of the 20th and 21st centuries. World War I represented the first total war in history, based on new weapons systems developed during the Industrial Revolution. By the end of the First World War, a flawed peace treaty resulted in a twenty-year truce before the next global war. The rise of Communism in Russia, the Great Depression, and the rise of Fascism in Europe and Japan led to the outbreak of World War II. World War II embraced a new component of warfare through the elimination of “undesirable social and racial elements” through the Holocaust. The Allied Powers ended the war only to see the growth of the Cold War between the Soviet Union and the Western Allies. This course earns ONE credit towards NCAA eligibility.

CCR Psychology Grades 10-12 1 credit CCR

This is the study of human behavior that explores the basic and more complex concepts of psychology. The teaching methodology will stress increased hands-on learning activities and will be more concrete than theoretical in nature. Students are expected to demonstrate proficiency in the articulation of how and why animals and humans behave as they do. This course is a rigorous introduction to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles and phenomena associated with each of the major schools within psychology. They will also learn about the ethics and methods psychologists use in their science and practice. This course earns ONE credit towards NCAA eligibility.

AP PSYCHOLOGY Grades 10-12 1 credit AP

The AP Psychology course introduces students to the systematic and scientific study of human behavior and mental processes. While considering the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with such topics as the biological bases of behavior, sensation and perception, learning and cognition, motivation, developmental psychology, testing and individual differences, treatments of psychological disorders, and social psychology. Throughout the course, students employ psychological research methods, including ethical considerations, as they use the scientific method, evaluate claims and evidence, and effectively communicate ideas. The AP Psychology CED (Course and Exam Description) is also made available, and includes a more detailed layout of the course. **This course earns ONE credit towards NCAA eligibility.**

Sociology Grades 10-12 1 credit CCR

In this introduction to Sociology course, students will develop essential skills for academic success and informed citizenship. The course will emphasize effective reading and writing, academic research, and the application of sociological concepts to real-world situations. Students will also learn research design and implementation to gather and analyze data. Through collaborative projects and communication exercises, they will enhance their abilities to create and work with others. By exploring contemporary issues through a sociological lens, students will build skills in self-direction, perseverance, and problem-solving, allowing them to critically evaluate societal challenges and engage thoughtfully in discussions about social change. **This course earns ONE credit towards NCAA eligibility**

AP US History Grades 10-12 2 credits AP

AP US History is a college-level course designed to provide students with the content knowledge and critical thinking skills for a deep understanding of United States history. The course begins with the Exploration and spans to the present period. Through in-depth study, students will learn to analyze and assess primary and secondary sources to help them interpret the past and understand the history of our nation from a variety of perspectives. The AP Program in U.S. History strives to provide the student with the skills necessary to draw and communicate their own conclusions based on an understanding of the broad scope of American History and evidence. This course will be team-taught with the teacher of the Honors American Literature. Students will be prepared to take the AP US History national exam after taking this course. (AP course offerings are determined on an annual basis). This course earns ONE credit towards NCAA eligibility.

Mythology Grades 9-12 1 credit CCR

Throughout human history, myths have been used to explain and connect the world around us to the human experience. This course will examine the relationship between mythology and culture. The majority of this class will focus on the myths and culture of Ancient Greece, examining universal themes and patterns found everywhere from ancient stories to modern-day popular culture. Towards the end of the semester, students will complete a final research project on a world mythology other than Ancient Greek. This course earns ONE credit towards NCAA eligibility.

Women In US History Grades 9-12 1 credit CCR

This semester-long course will focus on a variety of women in American history and their important roles in the nation even before they were seen as full citizens. Beginning with women's role in Native American communities all the way to modern day women who impact society, government, and culture, students will learn to analyze primary sources written by these women, secondary sources written about these women, and participate in discussions, debates, and research projects. Students will be able to take lessons from these women and apply them to their lives as they become important and active members of society. This course meets the US History requirement and is offered on a rotating basis with Women in US History. This course earns ONE credit towards NCAA eligibility.

Child Welfare Worker

Substance Abuse Counselor

Criminal justice is a broad field that focuses on the systems, laws, and institutions in place to address crime and its prevention. It includes law enforcement, the court system, correctional facilities, and rehabilitation programs. Criminal justice professionals work to maintain law and order, investigate crimes, enforce laws, prosecute criminals, and help rehabilitate offenders.

Social work is a field focused on helping individuals, families, and communities improve their well-being and address various challenges, such as mental health issues, poverty, and family problems. Social workers work in various settings, including schools, hospitals, mental health centers, and the criminal justice system, providing support and advocacy for vulnerable populations.

Appendix E: Laconia High School Honors Contract

Department: _____ Student: _____

Students may sign a contract to take this course for Honors credit. The student must commit to completing the additional requirements to receive Honors credit and consent from a parent or guardian. The expectations and requirements for you will be greater, but some of the benefits of taking a course for Honors are as follows:

- ★ Your grade is weighted more heavily,
- ★ You will be able to explore additional topics to study,
- ★ You will improve your ability to read and write critically,
- ★ You will learn how to write annotated research papers,
- ★ You will have the opportunity to develop your time management and organizational skills,
- ★ You will apply higher-order thinking and problem-solving skills,
- ★ You will have the opportunity to hone your presentation skills,
- ★ You will be challenged.

Honors courses are more challenging, and strong academic habits and skills are necessary to be successful. These habits and skills include:

- ★ Self-motivation and self-discipline,
- ★ Strong organizational skills,
- ★ Strong writing, reading, speaking and listening, and problem-solving skills, * The ability to work independently and collaboratively,
- ★ Being on time and showing up for class,
- ★ Draw conclusions based inferences and on information from a variety of sources, * Using inductive and deductive reasoning skills.

To earn honors credit for this course, you must:

- ★ {Insert Content}
- ★ {Insert Content}

I, _____ (student name), agree to take this course for Honors credit. I understand that the rigor and workload will be greater than the students not taking the course for Honors credit. I also understand that this will go on my transcript as an Honors course and that I cannot opt to return to CCR later in the semester.
